

kentwood community church

kentwood community church

- worship center addition, kentwood, michigan

first church project was commissioned by successfully impressing the church board of directors with an innovative passionate design competition presentation / this 3,500-seat auditorium challenged the church community to look at the impact of Christian architecture with a semblance of site and interior space design / architectural design concept created a park approach to a community hall that led to the worship space / setting the stage for the community, warm materials and shapes create a human scale inviting to the congregation.

200,000 sq feet
